

For Immediate Release:

Wolf Electronix Names New Executive

New Cutting-Edge Machinery Acquired

January 16, 2007

Orem, UT – Wolf Electronix, an electronics contract manufacturer (CM) in Orem, Utah, has named Joe Morton, CPM, CPIM, as responsible for full implementation of their Material Resource Planning software and all material related processes for both the Utah and Colorado locations. Wolf experienced another record year with more than 50% growth in 2006.

Morton, with almost 30 years of experience in the high tech manufacturing sector, will oversee: inventory and document control personnel, parts tracking, expedited deliveries and purchase order closures, timely kitting of production batches, increase of inventory turns, identification and disposition of excess inventory, on-time shipping to customers and any other materials related issues, helping advance Wolf Electronix to World-Class status. Morton comes most recently from ClearOne Communications.

Wolf has state-of-the-art equipment scheduled to arrive first quarter and join their fleet of MyData & Fuji Vision SMT lines. Additionally, a sophisticated screen printer is also slated for the production floor. These recent acquisitions continue to affect pricing in a positive way and this is reflected in Wolf's thorough and timely quotation process. "This is the time to have your product quoted if you have ever considered pricing an assembly domestically," states Jim Trent, Jr., President.

Wolf currently employs 124 people in Orem. In the past, Wolf was awarded the – #1 Utah Fastest Growing Company and the Top 25 Under 5. Their facilities have 6 production lines (one of the largest for a CM in the intermountain West). Wolf is a customer driven company with a commitment to their customer's needs. "Our fanatical attention to details and quality is something that keeps our customers coming back," remarked Jim Trent, Jr.
